

## *Tips from the Town*

# Safety and Care

- *Do you feel your water consumption is rising?*

Check your toilet for a leak. Take something with color such as Kool-Aid, tea, coffee, pour it in the tank of your toilet, wait a few minutes. If the color appears in the bowl of your toilet, you have a leak. Toilet leaks often go undetected and even a small leak can add up considerably on your monthly water bill.

- *When winter approaches remember to disconnect your garden hose and drain your outside faucet.*

Frozen and busted outside faucets can cause big leaks, so be sure to winterize around your house. Trailer owners also need to make sure your skirting is complete to help keep pipes from freezing.

- *Be respectful to children who walk to & from school.*

When it snows, please keep your sidewalk clear so children can walk safely back and forth to school.

- *Please note that Main Street and Oxford Street is the snow route.*

If we receive 2 or more inches of snow residents in these areas need to find somewhere else to park so that the snow plow can keep the snow route open.
